FINANCIAL SERVICES SURVEY

September 2025

Embargo: 00:01hrs 2 October 2025

Financial services volumes fall for second consecutive quarter

Financial services firms reported that businesses volumes declined in the quarter to September at the fastest rate since June 2020. Despite this sharp deterioration in activity, sentiment was broadly flat in the three months to September, marking an improvement compared with the previous quarter's steep drop. Meanwhile, the value of non-performing loans was broadly flat in the quarter to September. However, average spreads fell at a fast rate in Q3, placing pressure on margins. Against this backdrop, profitability continued to decline in the quarter to September, though at a slower pace than in Q2, while headcount fell firmly.

Looking ahead, FS firms expect trading conditions to improve, with volumes growth set to make a strong recovery next quarter. Average spreads are set to decline at a slower pace over the next three months, while the value of non-performing loans is expected to remain unchanged. Headcount is anticipated to decline at a slower rate in the next three months, while profitability is projected to rise at a fast rate. FS firms expect to increase investment in IT over the next 12 months (compared to the previous 12), while slightly reducing capex on land & building and vehicles, plant & machinery.

Financial services business volumes decline at fastest rate since June 2020

Business volumes in the FS sectors decreased in Q3 for the second consecutive quarter, and at the fastest rate in over five years. Notwithstanding, sentiment was broadly flat, following four consecutive quarters of decline. The value of non-performing loans was unchanged in the quarter to September, while average spreads contracted rapidly. Profitability declined at a slower pace than in Q2. Headcount fell more firmly over the quarter to September.

Firms anticipate that volumes will make a return to strong growth next quarter. The value of non-performing loans is expected to remain unchanged, while average spreads are set to decline at a slower rate over the next three months. As a result, firms expect profitability to rise at a fast rate next quarter, while headcount is anticipated to decline at a slower rate.

Demand uncertainty concerns at their most widespread in 13 years

FS firms expect to increase investment in IT over the next 12 months (compared to the previous 12). Capital expenditures on land & buildings and vehicles, plants & machinery are expected to decline, but to a lesser extent than last quarter. Uncertainty about demand continued to be the most commonly cited factor expected to limit investment over the year ahead, with the share now at its highest since September 2012. Just over a quarter for firms cited "other" factors as likely to limit investment, with comments pointing to challenges arising from taxation and regulation.

Contents

Page 3 Banking volumes drop

Banking business volumes plummeted in Q3, while profitability also declined. Firms expect a strong rebound in volumes and profitability over the next quarter.

Page 6 General insurance volumes plummet

General insurance firms reported a sharp decline in businesses volumes in the quarter to September, following robust growth in June. Firms anticipate business volumes to be flat in the next three months.

Page 8 Investment management volumes fall modestly

Investment management business volumes fell modestly over the quarter to September, with the decline set to continue at a faster pace next quarter.

Further Information

Publications & Services

The CBI Economic Intelligence team draws upon the CBI's diverse contacts with British business to build an accurate assessment of the latest developments in the UK economy. There is widespread recognition of the team's expertise and professional standards. CBI survey outputs typically lead government statistics providing a vital bellwether of the economy. Government statistics, where available, are often slower to be published and subject to revision. The surveys have great breadth of coverage including manufacturing, distribution, consumer, business and professional services, financial services and SMEs. Results are carefully quality assured by economists and statisticians before release.

CBI Surveys Portfolio

- CBI Industrial Trends Survey (monthly and quarterly full results) since 1958
- CBI Distributive Trades Survey (monthly) since 1983
- CBI Financial Services Survey (quarterly) since 1989
- CBI Service Sector Survey (quarterly) since 1998
- CBI Growth Indicator (monthly) since 2014
